Be Prepared. What's the Law?

Martyn's Law, recently enacted in response to the Manchester Arena bombing, outlines how organisations should prepare for and respond to mass casualty events. It emphasizes both prevention and mitigation—helping businesses not only deter attacks but also act swiftly if the unthinkable happens.

Enhance your preparedness for Martyn's Law by equipping your premises with essential, life-saving emergency supplies. From injury management to safe, efficient evacuations, our products deliver immediate support in the critical period before emergency services arrive.

Critical injury

In an emergency, having the right tools within reach can make the difference between life and death. Our critical injury kits empower staff and bystanders to take immediate action when it matters most.

These kits contain essential supplies for controlling severe bleeding and providing emergency aid to casualties.

Mass evacuation

When every second counts, our mass evacuation kits are built for speed and simplicity. Packed in easy-to-grab bags, they're perfect for urgent exits.

Whether used alone or to boost existing first aid setups, each kit includes essential gear such as foil blankets, whistles, megaphones, and high-visibility vests—everything needed to guide crowds to safety.

Product Spotlight

TMT TOURNIQUET CIVILIAN MODEL

Rapid, reliable bleed control for emergencies

When every second counts, the TMT Tourniquet Civilian Model is your critical tool for stopping life-threatening bleeding fast – even with minimal first aid training.

Key Benefits:

- **Fast & effective haemorrhage control** – Designed to quickly stop severe arterial bleeding, helping save lives when time is critical.
- **User-friendly design** – The intuitive **Velcro strap** and **speed buckle** allow rapid application, especially around limbs like the leg.
- **Secure pressure hold** – A **windlass rod** with **retaining clip** ensures maximum pressure without slipping or loosening.
- **Track treatment easily** – The built-in **time tag** lets responders or medical professionals know exactly when it was applied, aiding further care.
- **Safe for anyone to use** – Ideal for general public, workplace first aid kits, schools, outdoor adventurers, or emergency response teams.

This bright orange model stands out in any trauma kit, making it easy to locate under stress. Built for real-world emergencies, it combines simplicity, security, and effectiveness – helping you take control when it matters most.

Apply tourniquet above the injured area.

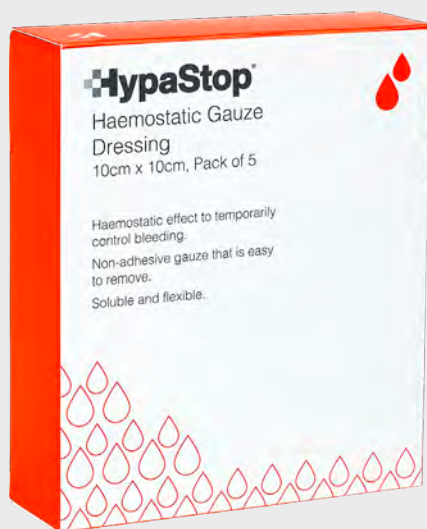

Twist windlass and secure under locking hook.

Keep tourniquet in place until emergency services arrive.

HYPASTOP® HAEMOSTATIC GAUZE DRESSING

Accelerated clotting for critical bleeds

When bleeding needs to stop now, HypaStop® Haemostatic Gauze delivers fast-acting, life-saving performance – even in high-stress situations.

Key Benefits:

- **Rapid clotting in under 3 minutes** – Infused with **sodium carboxymethyl cellulose (Na-CMC)** to trigger instant clotting and reduce blood loss fast.
- **Highly effective vs. standard dressings** – Outperforms traditional gauze with **faster, stronger clot formation**, especially in severe wounds.
- **Simple to use** – Designed for effortless application to both **shallow cuts and deep wounds**, no medical background needed.
- **Individually sterile & safe** – Each 10cm x 10cm gauze is **sterile, wrapped**, and **free from side effects**, ensuring peace of mind.
- **Multipack value** – Comes in a **pack of 5** for stocking trauma kits, emergency bags, or first aid stations.

Ideal for first responders, workplace first aiders, or anyone preparing for emergencies, HypaStop® Haemostatic Gauze Dressing puts powerful bleeding control in your hands – fast, safe, and effective.
