

FORCE8™ & PRESSTOCHECK™ WITH DAILY FACE FIT CHECK TECHNOLOGY

Face-fit testing is reassuring but how can you be sure that you have donned the mask correctly each time you wear it? With PressToCheck™ filters you can instantly check that you have the correct seal every time you don your mask before entering the hazard zone.

✓ SUPERIOR COMFORT & FIT
Thermoplastic rubber mask available in three sizes for superior fit to most face shapes. Adjustable 4-point cradle ensures an effective facial fit.

✓ TYPHOON™ VALVE
Low resistance exhalation valve for easy breathing, with stable mask configuration. Made from silicone it performs well at very low temperatures.

✓ COMPATIBILITY
The low-profile, swept-back design Force™8 PressToCheck™ enables excellent visibility, allowing the filters to be worn effectively behind all types of faceshield and welding visor.

✓ FIT IT
DON THE MASK
Put the straps and harness over your head and pull the straps to a suitably tight and comfortable fit.

✓ PRESS IT
PRESSTOCHECK™
Press the front and backs of both filter covers together to stop air from entering through the filters.

✓ CHECK IT
INHALE - No air should come through the mask.
1 look forward and adjust the mask until a seal is created. Repeat this process whilst looking **2 up**, **3 down**, **4 left** and **5 right** to complete the check.
